For the ignorance, we shall use Statistics

*The theory of probabilities is the most happy supplement to ignorance and to the weakness of the human mind*

Laplace

Determinism

For the ignorance, we shall use Statistics

*The theory of probabilities is the most happy supplement to ignorance and to the weakness of the human mind*

A cursive signature of the name "Laplace" written in black ink on a white background. The signature is fluid and personal, with a long horizontal stroke underlining the name.

Determinism

Philosophical Essay on Probabilities 1814

Molecules in 1873

*The equations of dynamics completely express the laws of the historical method as applied to matter, but the application of these equations implies a perfect knowledge of all the data. [...] we are obliged to abandon the strict historical method, and to adopt the statistical method of dealing with large groups of molecules*

J. Clerk Maxwell

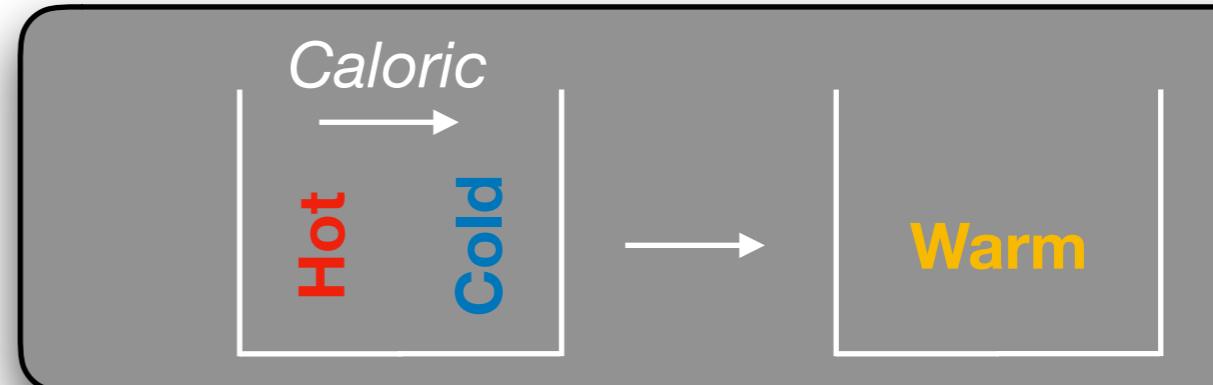

*Scientific Papers of James Clark Maxwell, 2 vol.,  
William Davidson Niven ed., Cambridge  
University Press, 1890, vol. 2, p. 373-374*
